PROFESSIONAL SUMMARY

BSc Computer Science & Informatics graduate (Expected Nov 2026) at the University of Johannesburg with practical experience in designing and developing scalable web and mobile applications. Experienced across the full software development lifecycle using Java, C++, C#, React, Next.js, Flutter, Node.js, Express, TypeScript, MySQL, and PostgreSQL. Passionate about building high-quality software, learning new technologies, and solving real-world engineering problems. Possesses a strong foundation in software engineering principles, object-oriented programming, and REST APIs.

TECHNICAL SKILLS

- Languages:** Java, JavaScript, TypeScript, C++, SQL, Dart, C#
- Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- Databases:** MySQL, MariaDB, Prisma, PostgreSQL
- Tools & Tech:** Git, GitHub, VS Code, Postman, Flutter, Riverpod, Cloudflare R3 Storage (AWS S3), APIs

PROJECTS

Film Management System	Company Project
Technologies: React, TypeScript, Tailwind CSS, PostgreSQL, Vercel, Resend, Cloudflare	
Developed a full-stack Next.js 15 application for managing commercial film processing orders, customer workflows, and financial reporting. Designed an in-browser directory packaging engine using JSZip to recursively compress and stream raw folder uploads directly to S3, reducing server CPU overhead to 0%. Architected database-level state machine using Prisma and PostgreSQL, leveraging atomic constraints to enforce strict status transitions and secure historical records. Designed reusable, modular Tailwind CSS components following responsive UI principles. Deployed on Vercel with automated deployments Live Website: film-process.masieseremu.co.za GitHub: github.com/MasieJr/Film-Processing	
Car Rental Website	Academic Project
Technologies: React API, Node.js, Express.js, MySQL/MariaDB, JWT	
- Built a full-stack car rental platform supporting customer bookings, invoice generation, and administrator workflows. - Designed 10+ RESTful API endpoints for authentication, vehicle management, bookings, invoicing, and reporting. - Managed a relational database with 10+ normalized tables. GitHub: github.com/MasieJr/car_rental_app	
UniConnect – University Communication Platform	Academic Project
Technologies: React, Flutter, Node.js, Express.js, MySQL/MariaDB, Socket.IO, Riverpod, Dio, JWT	
- Developed the mobile application using Flutter, implementing authentication, task management, timetable, forums, and group chat functionality. - Designed and built RESTful backend APIs with Express.js, JWT authentication, and Socket.IO to support secure, real-time communication. - Designed and maintained the MySQL/MariaDB database schema using normalized tables and foreign key relationships for users, modules, forums, tasks, and messaging. - Collaborated with teammates integrating the backend services with both the Flutter mobile application and the team's web frontend. GitHub: github.com/IFMTYP2024/team37-main & github.com/IFMTYP2024/team37-mobile	

EDUCATION

University of Johannesburg <i>Bachelor of Science in Computer Science and Informatics</i>	2022 – 2026 (Expected Sep – Nov 2026)
Aloe High School <i>National Senior Certificate (Bachelor's Pass)</i>	Matriculated 2020

COURSE WORK

Computer Science (1A–3B) and Informatics (1A–3B), covering Object-Oriented Programming, Data Structures & Algorithms, Software Engineering, Database Systems, Systems Analysis & Design, Information Systems, Networking, Operating Systems

PROFESSIONAL EXPERIENCE

Sales Assistant - Foto First Cresta (Part-time)	2022 – Present
• Consulted customers on camera, lens, and accessory configurations, translating deep hardware knowledge into tailored consumer recommendations. • Acted as first-line technical support for image processing hardware and specialized software adjustments, maximizing customer retention. • Coordinated stock management workflows and sales reconciliation registers with excellent accuracy.	
Sales Assistant (Saturdays) - CameraTek (Part-time)	2023 – 2025
• Successfully balanced full-time academic workloads in CS with structured client engagement at an industry-leading repair and retail outlet. • Diagnosed complex photography equipment issues and coordinated escalation tickets to backend diagnostic engineers.	

SOFT SKILLS

Problem Solving • Teamwork • Clear Technical Communication • Analytical Thinking • Active Collaboration • Time Management

LANGUAGES

English: Professional Working Proficiency
Shona: Native
isiZulu & isiXhosa: Conversational
